# What is Governance?

- Governance is the set of policies, roles, responsibilities, and processes that guide, direct, and control how an organization's business divisions and IT teams cooperate to achieve business goals.

# What is Governance?

- A comprehensive governance plan can benefit your organization by:
  - Streamlining your SharePoint Server 2010.
  - Helping to protect from security threats or noncompliance liability.
  - Helping ensure the best return on your investment in technologies.

Solutions*

# What should be governed?

- A successful SharePoint Server 2010 deployment requires the following elements:
  - Information architecture
  - Physical Architecture
  - Customization Policy

SharePoint  
Solutions*

## Who should determine governance policies?

- A successful deployment of SharePoint Server 2010 requires ongoing communication and partnership among business managers, IT professionals, and information workers. When you create a Center of Excellence, include representatives from as many of the following groups and roles as possible:

# Who should determine governance policies?

- Executive stakeholders
- Financial stakeholders
- IT leaders
- Business leaders
- Information architects (taxonomists)
- Compliance officers
- Development leaders
- Information workers
- Trainers

# How should governance be implemented?

- Consider the following suggested stages of a governance implementation for your organization:
  - Determine initial principles and goals.
  - Classify the business information/content.
  - Develop an education strategy.
  - Develop an ongoing plan.

# Sharepoint 2010 Governance features

- Managing SharePoint installation in an enterprise
- IT service features
- Information management
- Information architecture features

SharePoint  
Solutions*

## IT Services features

- A new service application architecture that replaces the SSP model.
- Backup and restore improvements.
- Multitenancy, which creates a true hosting environment and makes it possible to share service resources across customers (tenants) while partitioning data based on site subscriptions.
- Managed accounts that automate password changes.

RJB
